ENRICO CECCHETTI

SENIOR SOFTWARE ENGINEER

(+39) 3388578811 ienricocecchetti@gmail.com Turin, Italy EnricoCecchetti ieCecchetti web

Python, Java, Django, Vue | AI & Cloud Enthusiast

Passionate software engineer with 8+ years of experience designing and delivering scalable back-end and full-stack applications in fintech, real estate, and data domains. Expert in Python, Java, and modern web frameworks, with a strong focus on system reliability, automation, and improving developer productivity. Enthusiastic about leading initiatives that leverage AI and cloud technologies to solve complex problems and drive innovation.

EXPERIENCE

Senior Software Developer

Nearform

Jun 2026 – now (REMOTE) IRL

Design and development of software solutions for the civil sector to automate the generation of documents related to real estate transactions. Implementation of processes to assess and report risks, such as pollution and zoning issues, reducing manual workload and improving decision-making efficiency. Creation of data pipelines to collect, process, and expose information via RESTful APIs.

- Python, Django, Vue, Java, SpringBoot, Goland, JUnit;
- Mysql, MongoDB, PostgresSQL;
- Docker, BitBucket, AWS, Jenkins, Sonar, Snyk, CI/CD, GIT;

Senior Software Developer

Septeo Proptech (FR)

May 2022 – Jun 2026 (REMOTE) Sophia-Antipolis

Design and development of software solutions for the civil sector to automate the generation of documents related to real estate transactions. Implementation of processes to assess and report risks, such as pollution and zoning issues, reducing manual workload and improving decision-making efficiency. Creation of data pipelines to collect, process, and expose information via RESTful APIs.

- Python, Django, Vue, Java, SpringBoot, Goland, JUnit;
- Mysql, MongoDB, PostgresSQL;
- Docker, BitBucket, AWS, Jenkins, Sonar, Snyk, CI/CD, GIT;

Consultant - Java Developer

IrisCube Reply

Sep 2020 – May 2022 Torino, Italy

Design and development of high-performance, scalable back-end microservices for high-traffic applications serving major Italian clients in the banking sector, including companies such as **Intesa Sanpaolo**.
Focus on maintaining system reliability, minimizing latency, and ensuring seamless data handling, while enabling secure real-time transactions for critical banking operations.

- JEE, Spring-boot, Maven, JUnit, Python, Microservices and Restful API's;
- SQL, MongoDB and Kafka dbs;
- OpenShift, Jenkins, Sonar, git;
- Google cloud sevices like DLP and DialogFlow;

Junior Consultant - Java Developer

ALTEN

Sep 2019 – Sep 2020 Biot, France

R&D project on auto-Data-Preprocessing and auto-Machine Learning techniques through Meta-learning used for auto **extraction**, **process** and **enrichment** of the customer's data pool.
Development (from scratch) of a preprocessing framework in Java, capable of competing with existing ETLs.

- Machine learning, Meta-learning and preprocessing techniques;
- JEE, Maven, Weka, JUnit, Python, Pandas, scikit learn;
- Neo4J, Microsoft SQL server, MySql;

Education

Master: Computer Engineering
PoliTO, Polytechnic of Turin
2017 - 2020 Turin,Italy

Bachelor: IT science and Automation
UNIVPM, Polytechnic University of Marche
2013 - 2017 Ancona,Italy

Achievements

AWS Nanodegree Udacity
Udacity

Language Certification
English B2 level, IELTS 6.5

Snowboard Coach - Website admin
Kolbe SciClub Torino

Languages

Italian: Native ●●●●●
English: Fluent (B2) ●●●○○
French: Beginner (C1) ●●○○○

Soft Skills

Teaching | Challenge Oriented | Team Work | Hardwork | Problem Solving | Flexibility

Technical Skills

Languages: Python, Java, JavaScript, Dart
Frameworks: Django, Flask, SpringBoot, Vue, Flutter
Databases: PostgreSQL, MySQL, MongoDB
Tools: Docker, Jenkins, Git, AWS, Elasticsearch, Logstash, Kibana
Concepts: RESTful APIs, Microservices, CI/CD

Interests

Coding | Programming languages | AI | App | Web development | Alpinism

Researcher assistant

PoliTO / Netgroup **Polito.**

Oct 2017 - May 2018 Torino

Research and development of a standardized data format for managing and exchanging **NFV** (Network Function Virtualization) and **SDN** (Software-Defined Networking) data within a complex network infrastructure.
Furthermore, the implementation of a robust **RESTful** web service enabled efficient communication and data exchange between network nodes, ensuring reliability, scalability and compliance with industry standards.

- State-of-the-art research on the new network architectures SDN and NFV.
- Java, Maven, RESTful services;

INTERNSHIP

Master Thesis Internship

Software Developer

September 2019 - March 2020 Biot, France

Research and development of a system for **automated data preprocessing** using advanced **Meta-learning** techniques.
Creation of a custom **data connector** to transform data from **graph format to tabular**, facilitating the migration of data from **Neo4J to SQL** databases. This work required expertise in **Java** and **Python**, as well as experience with multiple databases, including **SQL**, **NoSQL**, and **GraphDB**.
Application of knowledge in **data structures**, **Big Data analysis**, and **Machine Learning** to ensure efficient data processing and optimized system performance.

Bachelor Thesis Internship

Research and Development

September 2016 - May 2017 Ancona, Italy

Research and development of an Android application in the **Biomedical field**, focusing on **Activity Recognition** by leveraging a combination of **Phone** and **Smart-Watch** sensors.
Project required extensive experience with **C++**, **Android development**, and applying **Machine Learning techniques** to accurately interpret sensor data and identify user activities.

SOME OTHER PROJECTS

Alexa Developer

Feb 2024

Are you an anime fan? Are you tired of continuously opening some apps to check if your favorite anime released the new episode? I am developing a skill for **Alexa** for returning live information about the anime you are interested in.
My project will be published soon on my Git Profile.

- Alexa skills, Python.
- MongoDB;

WebMaster [WP]

Sept 2023 – Present

Web development and maintenance of multiple websites, including content updates, performance optimization, and implementation of new features using **WordPress**, **HTML**, and **CSS**.
Maintained websites:

- **Tools:** Git, VS Code, Chrome DevTools, PHPMyAdmin
- **WordPress Plugins & Integrations:** Elementor, WPForms, Google Scripts, custom shortcodes
- **Infrastructure:** AWS Route 53, Domain Creation & Migration, Amazon SES, SMTP setup
  - Kolbe Sci Torino
  - Docks Group

I hereby authorize the processing of my personal data in accordance with Article 13 of the GDPR 2016/679 for the purposes of recruitment and selection.
